IBCSC / OBSERVATOIRE

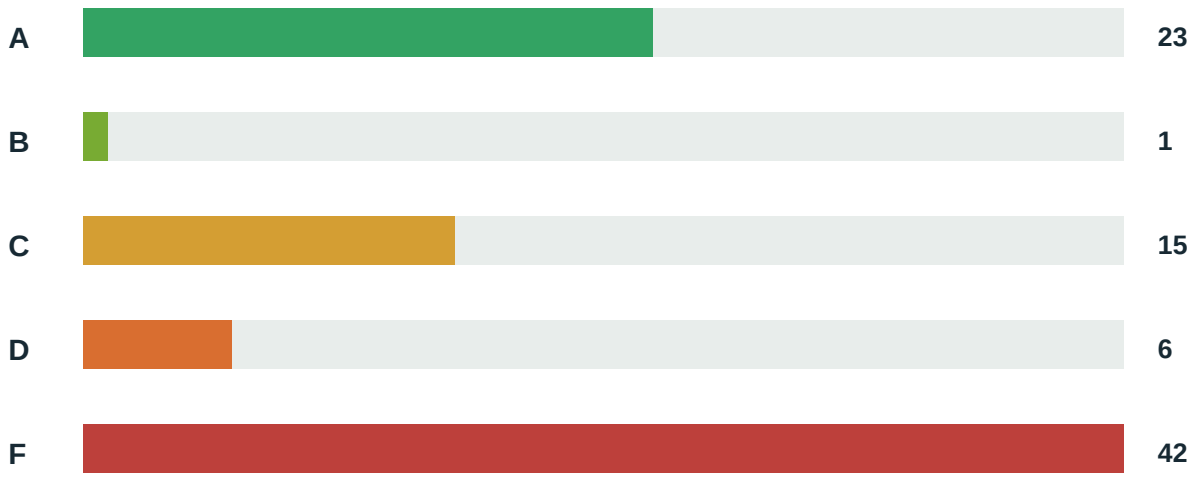

Barometre du web belge

Synthese publique - donnees agregees

Genere le 28.10.2026 13:14 UTC

87 / 87 Domaines observes	**57.4** Indice moyen /100	**44** Avec CISA KEV
48 Signal critique	**41** Logiciel en fin de vie	**42** Service sensible expose

Repartition des notes de posture

Lecture

71 domaines presentent au moins un signal observable; 16 ne presentent aucun signal dans le perimetre mesure.

Une note mesure une exposition observable a un instant donne. Elle ne prouve ni securite parfaite, ni compromission.

Alertes publiques et methode

Signalements de sources publiques recents. Un site legitime peut aussi etre compromis.

Registre autonome: 771484 decouverts | 635733 observes | 612540 notes | hygiene 48,3/100

Domaine	Classification	Source
cabinetdelacambre.be	block	**OPENPHISH**

Perimetre et limites

Le registre autonome suit les liens publics entre domaines .be et observe a faible cadence DNS, HTTPS, certificats et en-tetes en respectant robots.txt. Sans fichier de zone complet, il ne peut garantir 100 % des domaines .be. Aucun port supplementaire ni tentative d exploitation; les controles approfondis restent reserves aux proprietaires verifies.

Sites a exposition critique - indice >= 80/100

Indice de risque technique, pas confiance de l IA ni probabilite mesuree de fuite. Les associations passives a une infrastructure peuvent etre influencees par un hebergement partage. Une fuite est possible, pas etablie. Le statut officiel ne reduit pas le score.
