

Barometre du web belge

Synthese publique - donnees agregees

Genere le 11.09.2026 18:27 UTC

Repartition des notes de posture

Lecture

61 domaines presentent au moins un signal observable; 26 ne presentent aucun signal dans le perimetre mesure.

Une note mesure une exposition observable a un instant donne. Elle ne prouve ni securite parfaite, ni compromission.

Alertes publiques et methode

Signalements de sources publiques recents. Un site legitime peut aussi etre compromis.

Registre autonome: 566181 decouverts | 239527 observes | 231943 notes | hygiene 50,4/100

Domaine	Classification	Source
78-20-115-5.access.telenet.be	block	URLHAUS
www.nccommunication.be	block	URLHAUS

Perimetre et limites

Le registre autonome suit les liens publics entre domaines .be et observe a faible cadence DNS, HTTPS, certificats et en-tetes en respectant robots.txt. Sans fichier de zone complet, il ne peut garantir 100 % des domaines .be. Aucun port supplementaire ni tentative d exploitation; les controles approfondis restent reserves aux proprietaires verifies.

Sites a exposition critique - indice $\geq 80/100$

Indice de risque technique, pas confiance de l'IA ni probabilité mesurée de fuite. Les associations passives à une infrastructure peuvent être influencées par un hébergement partagé. Une fuite est possible, pas établie. Le statut officiel ne réduit pas le score.
